Persona Profile Template

Purpose: Build a grounded persona from your client interview before you run a Day-in-the-Life or Think–See–Feel–Do analysis. A good persona is specific and evidence-based — rooted in what the client actually said, not a generic stereotype of their role.

Group: 6, ThinkFeelImagine

Member names and IDs:
6788112 Waris (Beam)
6788124 Leenawat (Sunny)

1. Persona at a Glance

Persona name: Amara Diallo

Role/Occupation: Operations Director

Age: 38

Location: Off-grid rural villages

> *"We can wire every household in a village for power, but if the donor can't see who's actually getting electricity — and whether it's fair — the funding never comes, and the lights we already turned on eventually go dark too."*

2. Quick Facts

Organization / affiliation	SolarReach
SDG or focus area	SDG 7 — Affordable and Clean Energy
Experience level in this domain	12 years
Reports to / works with	To the Executive Director and closely with Fatou (donor liaison)
Technology comfort (Low / Med / High)	Medium
Primary device(s) used	An Android phone

3. Background & Context

A short narrative (3–5 sentences) describing who this persona is, their day-to-day responsibilities, and the context they operate in.

Amara Diallo is a professional who grew up in Senegal and studied business administration. She has a background in logistics, having worked with an NGO distributing food in rural areas, where they witnessed the lack of basic infrastructure in off-grid communities. About four years ago, she joined SolarReach, a company focused on providing electricity access through a

sustainable business model. Her day-to-day responsibilities involve leveraging their logistics expertise to support SolarReach's mission, despite not having a technical background in energy, which they acquired on the job. She operates in a context that combines business strategy with social impact, aiming to reduce aid dependency by delivering sustainable energy solutions.

---

4. Goals, Motivations & Frustrations

What is this persona trying to accomplish, and what gets in their way?

Goals & motivations	Frustrations & pain points
Clear real-time visibility across all villages.	No reliable visibility into what technicians are doing in the field.
Clean, trustworthy data that she can send to Fatou without assembling it manually.	Billing disputes with no clean records to resolve them.
Fewer billing disputes eating up her time.	Manual, messy donor reporting I don't fully trust.
Get operationally ready to scale to 50 new villages.	Rigid prepaid cutoffs that hurt vulnerable households.

5. Behaviors & Habits

How does this persona actually work — not how they say they work?

Typical behaviors / habits	She checks her phone constantly, first thing in the morning and last thing at night. She is a list-maker and likes knowing what's pending. She follows up a lot because things slip through otherwise.
Tools & systems used regularly	WhatsApp heavily, Excel for reporting, her basic mobile app for account lookups, and phone calls more than anything else.
Where they get information / who they trust	She trusts experienced technicians over app data due to gaps, while Fatou ensures donor information accuracy.
Decision-making style	She's pragmatic and quick to make decisions, preferring a decent decision soon than a perfect one late. However, she values consulting those affected before implementing changes, as she learned the hard way at her NGO job.

6. Needs Summary

Distill the persona into a short, prioritized list of needs your system should address.

Need	Why it matters	Priority (H/M/L)
Real-time field visibility	She can't manage what she can't see	H
Automated donor reporting	Funding depends on it	H
Flexible payment options	Rigid cutoffs hurt vulnerable families	H
Offline data capture	Technicians lose connectivity constantly	M

7. Evidence & Assumptions

Keep the persona honest: separate what came directly from the interview from what you inferred.

- Directly from the interview:
  - Persona at a Glance
  - Quick Facts
  - Goals, Motivations & Frustrations
  - Behaviors & Habits
  - Needs Summary
- Inferred / assumed — needs validation: -
- Open questions to ask in a follow-up: -

Tip: once this profile is complete, use it as the starting point for a Day-in-the-Life timeline or a Think–See–Feel–Do empathy map.
